

June 2, 1970.

(VIA TELBEG)

The Division of Environmental Engineering of Sir George Williams University, with co-sponsorship of the Montreal Branch of The Engineering Institute of Canada, is holding a two day Symposium on Panelized Building Systems. It is being held in the Henry F. Hall Building of Sir George Williams University, June 2 and 3.

The Symposium will deal with Research, Application and Design aspects of panelization in building systems. A turn out of 250 engineers, administrators and professional men is expected. About 10 Companies, well-known on the construction market, will display their material pertinent to the subject.

For further information, please call Mr. Kirk Odabashian at 879-4079 or Mr. Cedric Marsh at 879-4555.
